

SYSTEM AND METHOD FOR ASSISTING AN ORGANIZATION TO IMPLEMENT AND
MAINTAIN COMPLIANCE WITH VARIOUS OBLIGATIONS

Abstract of the Disclosure

5 The invention comprises a system for assisting an organization to implement
and maintain compliance management programs, the system comprising a plurality of
modules relating to particular legislative or other obligations with which the
organization is required to comply; at least one master database containing
information on said legislative or other compliance obligations; at least one slave
10 database containing and allowing entry of information of activities and incidents or
accidents in the organization and assessments of the organization; and report
generating means for generating a report on actions required to render the
organization complaint with the legislative or other requirements in the master
database.
